**Course Code:** MAT*254  
**Course Type:** L  
**Elective Type:** G/LAS/M

**Prerequisites:**  
C- or better in Precalculus (MAT*186)

**Corequisites:**  
None

**Other Requirements:**  
None

**Course Descriptors:**  
Make certain that the course descriptors are consistent with college and Board of Trustees policies, and the current course numbering system.

**Catalog Course Description:**  
This course covers the following topics: limits, continuity, and differentiation of algebraic and transcendental functions, including trigonometric, exponential, logarithmic, inverse trigonometric, and hyperbolic functions. Also included are applications of the derivative, antidifferentiation, definite integrals, and the fundamental theorem of calculus.

**Topical Outline:**  
List course content in outline format.

1. Review of functions  
2. Limits of functions  
3. The derivative of algebraic and transcendental functions  
4. Applications of the derivative  
5. Integrals and the fundamental theorem of calculus

**Outcomes:**  
Upon successful completion of this course, the student will be able to do the following:

**COURSE:**
1. calculate limits using the limit laws  
2. use the precise definition of a limit
Calculus I

**PROGRAM:** *(Numbering reflects Program Outcomes as they appear in the college catalog)*

**GENERAL EDUCATION:** *(Numbering reflects General Education Outcomes as they appear in the college catalog)*

**Quantitative Reasoning** - Students will learn to recognize, understand, and use the quantitative elements they encounter in various aspects of their lives. Students will develop a habit of mind that uses quantitative skills to solve problems and make informed decisions.

**Demonstrates:** Interprets numerical information and applies sufficient laws of logic and mathematics to solve problems using numbers, symbols, graphs and/or descriptions.

**Does Not Demonstrate:** Misinterprets numerical information or insufficiently applies laws of logic and mathematics to solve problems using numbers, symbols, graphs and/or descriptions.

**Evaluation:**
List how the above outcomes will be assessed.

**Assessment will be based on the following criteria:**

- Quizzes
- Exams
- Projects as assigned

**Instructional Resources:**
List library (e.g. books, journals, on-line resources), technological (e.g. Smartboard, software), and other resources (e.g. equipment, supplies, facilities) required and desired to teach this course.

**Required:** None

**Desired:** None

**Textbook(s)**
Refer to current academic year printout.
