### Course Code: (eg. ACC 101)
- **MAT*272**

### Course Type:
- **D/L**

### Elective Type:
- **G/LAS/M**

### Prerequisites:
- C- or better in Calculus II (MAT*256)

### Corequisites:
- None

### Other Requirements:
- none

### Developmental: (yes/no)
- No

### Credit Hours:
- 3

### Lecture:
- 3

### Clinical:
- 0

### Lab:
- 0

### Studio:
- 0

### Other:
- 0

### TOTAL:
- 30

### Class Maximum:
- 30

### Semesters Offered:
- F/Sp

### Catalog Course Description:
Provides a substantial introduction to linear algebra from a mathematical viewpoint. Major topics include linear systems, linear transformations, matrices, determinants, vector spaces, eigenvalues, diagonalization, inner products, and orthogonality. This course will include a study of mathematical proof and requires mature abstract reasoning abilities.

### Topical Outline:
1. Solving systems of linear equations using matrices
2. Operations on matrices including addition, multiplication, inverses, and determinants
3. Vector spaces, eigenvalues, eigenvectors, and linear transformations
4. Orthogonality and symmetric matrices

### Outcomes:
Upon successful completion of this course, the student will be able to do the following:
1. perform the basic operations (addition and multiplication) on matrices and be able to find matrix inverses and determinants
2. solve a system of equations using row reduction and inverse matrices
3. use matrices to represent vector spaces and use linear transformations and eigenvectors accurately
4. Use dot products to determine orthogonality and be able to compute the least squares.
5. Apply these skills to various types of applications.

**PROGRAM:** (Numbering reflects Program Outcomes as they appear in the college catalog)

N/A

**GENERAL EDUCATION:** (Numbering reflects General Education Outcomes as they appear in the college catalog)

7. Quantitative Reasoning - Students will learn to recognize, understand, and use the quantitative elements they encounter in various aspects of their lives. Students will develop a habit of mind that uses quantitative skills to solve problems and make informed decisions.

**Demonstrates:** Interprets numerical information and applies sufficient laws of logic and mathematics to solve problems using numbers, symbols, graphs and/or descriptions.

**Does Not Demonstrate:** Misinterprets numerical information or insufficiently applies laws of logic and mathematics to solve problems using numbers, symbols, graphs and/or descriptions.

relevant theories, laws, and concepts to analyze or explain scientific information.

**Evaluation:**

List how the above outcomes will be assessed.

Assessment will be based on the following criteria:

- Homework
- Quizzes
- Tests

**Instructional Resources:**

List library (e.g., books, journals, online resources), technological (e.g., Smartboard, software), and other resources (e.g., equipment, supplies, facilities) required and desired to teach this course.

**Required:** N/A

**Desired:** N/A

**Textbook(s)**

Determined by instructor
